SUMMARY

Data Analyst and Systems Engineer with 2+ years of experience in quantitative data analysis, SQL/Python data querying, root-cause investigation, and cross-functional project scoping. Demonstrated success defining operational deliverables,and presenting key insights to stakeholders to safeguard user trust and platform integrity.

ACHIEVEMENTS

- Accelerated requirement analysis by **90%** (14 hours to 2) by utilizing Copilot scripts to conduct automated delta audits between baseline and client-specific data models.
- TCS Digital: Awarded **1500** Gems in the WINGS-1 technical assessment for technical proficiency and domain expertise (data Analytics) and recognized as a high talent.
- Spearheaded data visualization adoption at Savemom by persuading executive leadership to transition from static Excel spreadsheets to interactive Tableau dashboards.
- Awarded "Best Outgoing Student (2023–2024)", selected from the entire final year graduating batch across all departments of the college.

PROFESSIONAL EXPERIENCE

Tata Consultancy Services Sept 2024 – Present

Assistant System Engineer | Software Developer, Enterprise Invoicing Platform

- Mitigated platform data anomalies and processing defects by developing SQL validation logic and tracing root causes across production pipelines, safeguarding **100%** system integrity.
- Partnered cross-functionally with **7+ product, engineering, and finance stakeholders** to define project deliverables, translating business requirements into unified SQL data mappings and validation rules.
- Eliminated manual processing errors across **5 client implementations** by designing, developing, and deploying **7** automated batch pipelines from initial scoping through production testing.
- Standardized platform governance and real-time monitoring by leading technical workshops for the after-sales portfolio on deployment approvals and live system verification.

Savemom Jan 2024 – May 2024

Data Analyst Intern

- Uncovered operational and patient-care trends by cleaning, normalizing, and generating summary statistics across **900+** quantitative and qualitative maternal health records using Excel and SQL.
- Improved stakeholder decision making by building **2** recurring Tableau dashboards and presenting actionable data insights directly to leadership during weekly reviews.
- Eliminated data fragmentation across clinical workflows by collaborating with healthcare professionals to standardize data schemas and maintain unified master datasets.

PROJECTS

LLM-Based Toxic Comment Classification GitHub

- Automated abuse detection pipeline that utilizes zero-shot LLMs to flag toxic online behavior at scale while minimizing false-positive censorship. Evaluated across the Jigsaw dataset (achieving 92.5% accuracy and 97.5% recall), demonstrating how precision-recall trade-offs directly protect both user safety and legitimate speech.

Aegis Analytics: Content Moderation Operations Dashboard GitHub | Live app

- A real-time Trust & Safety command center built to detect over-enforcement and balance platform safety against user friction. Tracks appeal overturn rates, review SLAs, and false-positive trends across detection pipelines (classifier, user reports, hash matches) to give policy and operations teams actionable oversight

TECHNICAL SKILLS

Data Analysis & Languages: SQL, Python (Pandas, Plotly), Excel, Tableau, Power BI, GCP, Summary Statistics, Quantitative Data Analysis, Root Cause Analysis

Machine Learning & AI Systems: Abuse Classification Models (Random Forest, Decision Tree, SVM, Naive Bayes), Model Evaluation (Precision, Recall, F1, Confusion Matrix), LLM Prompt Engineering, Hugging Face

Currently Developing: Advanced Statistical Methods (Hypothesis Testing, Confidence Intervals), Enterprise Fraud & Abuse Prevention Frameworks.

EDUCATION

K.L.N. College of Engineering Oct 2020 – Mar 2024

B.E. Electronics and Communication Engineering *CGPA: 8.85*

CERTIFICATIONS

Google Data Analytics | Google Generative AI Leader | Claude Certified Associate - Foundations (CCAO-F) | Cisco Data Analytics Essentials
