Data Analyst with 2 years of experience turning enterprise datasets into decisions, using SQL, Python, Tableau, and Power BI for data validation. Focused on applying data and AI to improve product quality, operational efficiency, and user safety.

## Work Experience

**Assistant System Engineer – Tata Consultancy Services** **Sept 2024 – Present**

- Developed and customized 7 production jobs for the invoicing module by adapting existing workflows to client specific business requirements, automating order to invoice processing, and reducing manual effort by 40% across three client implementations.
- Reduced code analysis and client onboarding effort by 90% (14 hours to 2 hours) by leveraging AI assisted comparison of baseline and client specifications, accelerating implementation and improving development efficiency.
- Collaborated with 7+ cross-functional stakeholders, including business analysts, SMEs, and developers, to translate business requirements into mappings, application logic, and production ready workflows, ensuring accurate and timely client deliveries.
- Investigated production data-processing issues using SQL and root cause analysis, identifying defects and collaborating with technical teams to resolve production issues and improve application reliability.

**Data Analyst Intern – Savemom** **Jan 2024 – May 2024**

- Collected, cleaned, and validated healthcare datasets containing 300+ maternal health records, improving data quality through missing value resolution and collaboration with healthcare professionals.
- Built two recurring Tableau reports from raw healthcare data, cutting leadership review time by 35%.

## Core Skills

- **Data Tools:** SQL, Python, Power BI, Tableau, Microsoft Excel,Data studio.
- **Data Analysis Techniques:** Exploratory Data Analysis, Data Cleaning, Data Validation, Root Cause Analysis, Statistical Analysis, Metric Analysis, Hypothesis Testing.
- **Professional Skills:** Cross functional Collaboration, Stakeholder Management, Workflow Automation, Process Improvement, Project Management.

## Projects

**LLM-Based Content Moderation System for Toxic Comment Detection**

- Developed an LLM-powered content moderation system using Hugging Face Transformers, zero-shot prompting, and prompt engineering to classify abusive online comments from the Jigsaw Toxic Comment dataset.
- Evaluated model performance using Accuracy (92.5%), Precision, Recall, F1-Score, and Confusion Matrix to assess classification effectiveness and identify opportunities for improvement.

**Automated Plant Species Classification using Machine Learning**

- Built an end-to-end machine learning pipeline for plant species classification, performing data preprocessing, feature engineering, model training, and evaluation across multiple algorithms, achieving 98.48% accuracy with the best-performing model.

## Education

B.E. Electronics & Communication Engineering | K.L.N. College of Engineering CGPA: 8.86 **Oct 2020 – Mar 2024**

## Certification:

- Claude certified associate - CCAO-F
- Google Data Analytics Professional Certificate
- Google Generative AI Leader
- Python for Data Science (Edureka)

## Achievements

- Recognized as HI Talent candidate by getting distinction in internal assessment.
- Best Outgoing Student of the Year, 2023 and 2024 awarded by K.L.N. College of Engineering.
